ASWIN SANKAR TK

+91 6238908518 | aswinsankartk@gmail.com | linkedin.com/in/aswinsankartk
github.com/aswinsankartk | aswinsankartk.com

OBJECTIVE

Full-Stack Developer with hands-on experience in React.js, Next.js, TypeScript, Node.js, Express.js, MongoDB, and PostgreSQL. Independently built and deployed web applications featuring REST APIs, authentication, real-time collaboration, and AI integration. Seeking an entry-level software development role to build useful products, solve technical problems, and grow within an engineering team.

EDUCATION

Bachelor of Computer Applications, Bangalore University — Aug 2023 – Jun 2026

- CGPA: 8.1/10 | Coursework: Data Structures, Algorithms, OOP, DBMS, Software Engineering

SKILLS

Languages	JavaScript (ES6+), TypeScript, Python (fundamentals), SQL, HTML5, CSS3
Frontend	React.js, Next.js, Tailwind CSS, shadcn/ui, Responsive Design, Canvas API
Backend & APIs	Node.js, Express.js, REST API Design, JWT Authentication, Google OAuth
Databases	MongoDB, Mongoose, PostgreSQL, Supabase, Relational Schema Design
AI & LLMs	Gemini API, Prompt Engineering, Claude Code, Codex, Cursor
Tools & Practices	Git, GitHub, Postman, Vercel, Debugging, Manual Testing

PROJECTS

BingeStudy - AI-Powered Collaborative Study Platform
GitHub: github.com/aswinsankartk/bingestudy | Live Demo: bingestudy.vercel.app
Next.js, JavaScript, Tailwind CSS, Supabase PostgreSQL, REST APIs, Gemini 2.5 Flash

- Independently designed, developed, tested, and deployed a responsive AI-powered collaborative study platform for group learning, resource sharing, and AI-assisted academic support.
- Integrated the Google Gemini 2.5 Flash API to deliver contextual AI assistance using structured prompts and API workflows; implemented Google OAuth, email/password authentication, and role-based access control.
- Built Next.js components for authentication, group management, real-time messaging, file sharing, and AI-assisted discussions, including loading, empty, validation, and error states.
- Integrated 10+ REST API endpoints for authentication, group workflows, file uploads, messaging, and AI chat; designed PostgreSQL-backed workflows using Supabase for relational data, realtime messaging, and secure multi-format file storage.
- Used Cursor, ChatGPT, and Claude throughout development for code generation, debugging, refactoring, research, and testing; deployed the application on Vercel and maintained it using Git/GitHub.

Under Limit – Photo & Signature Resizer
GitHub: github.com/aswinsankartk/under-limit | Live Demo: under-limit.vercel.app
Next.js, TypeScript, Tailwind CSS, Canvas API

- Built and deployed a browser-based tool that resizes and compresses photos and signatures to target dimensions and KB limits for exam and job forms; supports JPEG, PNG, and WebP with fully client-side processing via the Canvas API.

EXPERIENCE

MERN Stack Developer Intern — Apr 2026 – May 2026
Codec Technologies — *Remote*

- Built responsive frontend interfaces and full-stack task-management features using React.js, Node.js, Express.js, and MongoDB.
- Developed REST APIs for task management; implemented JWT authentication and protected CRUD workflows.
- Used Git/GitHub and Postman to test APIs, resolve defects, and deliver features on schedule.
